

CMF-Level Rules · Orders Blocked

Rules 1 and 3 apply to shipping locations. Sub-bubbles inside each rule are individual listcodes (R3) and contact-count bands (R1), sized on a common orders scale.

Universe: 17.0M contact-attributable orders

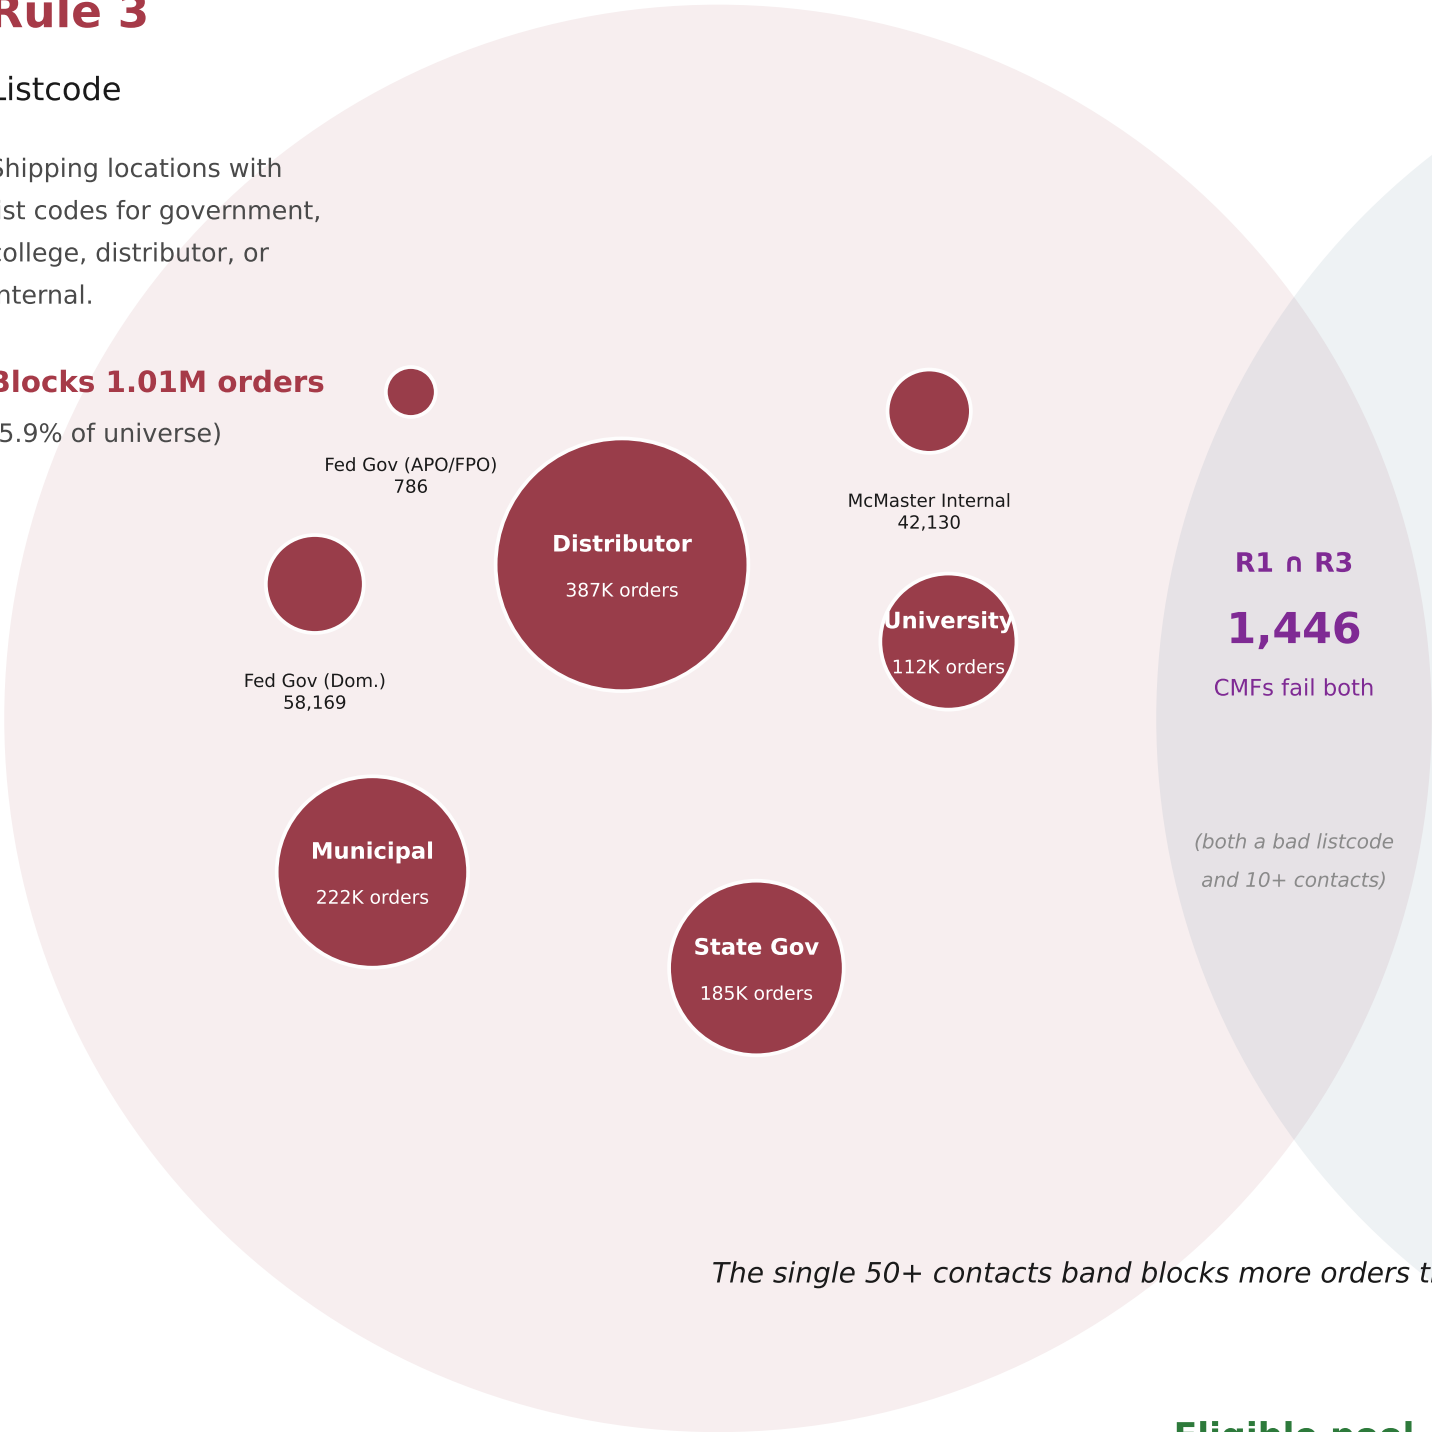

Rule 3

Listcode

Shipping locations with list codes for government, college, distributor, or internal.

Blocks 1.01M orders

(5.9% of universe)

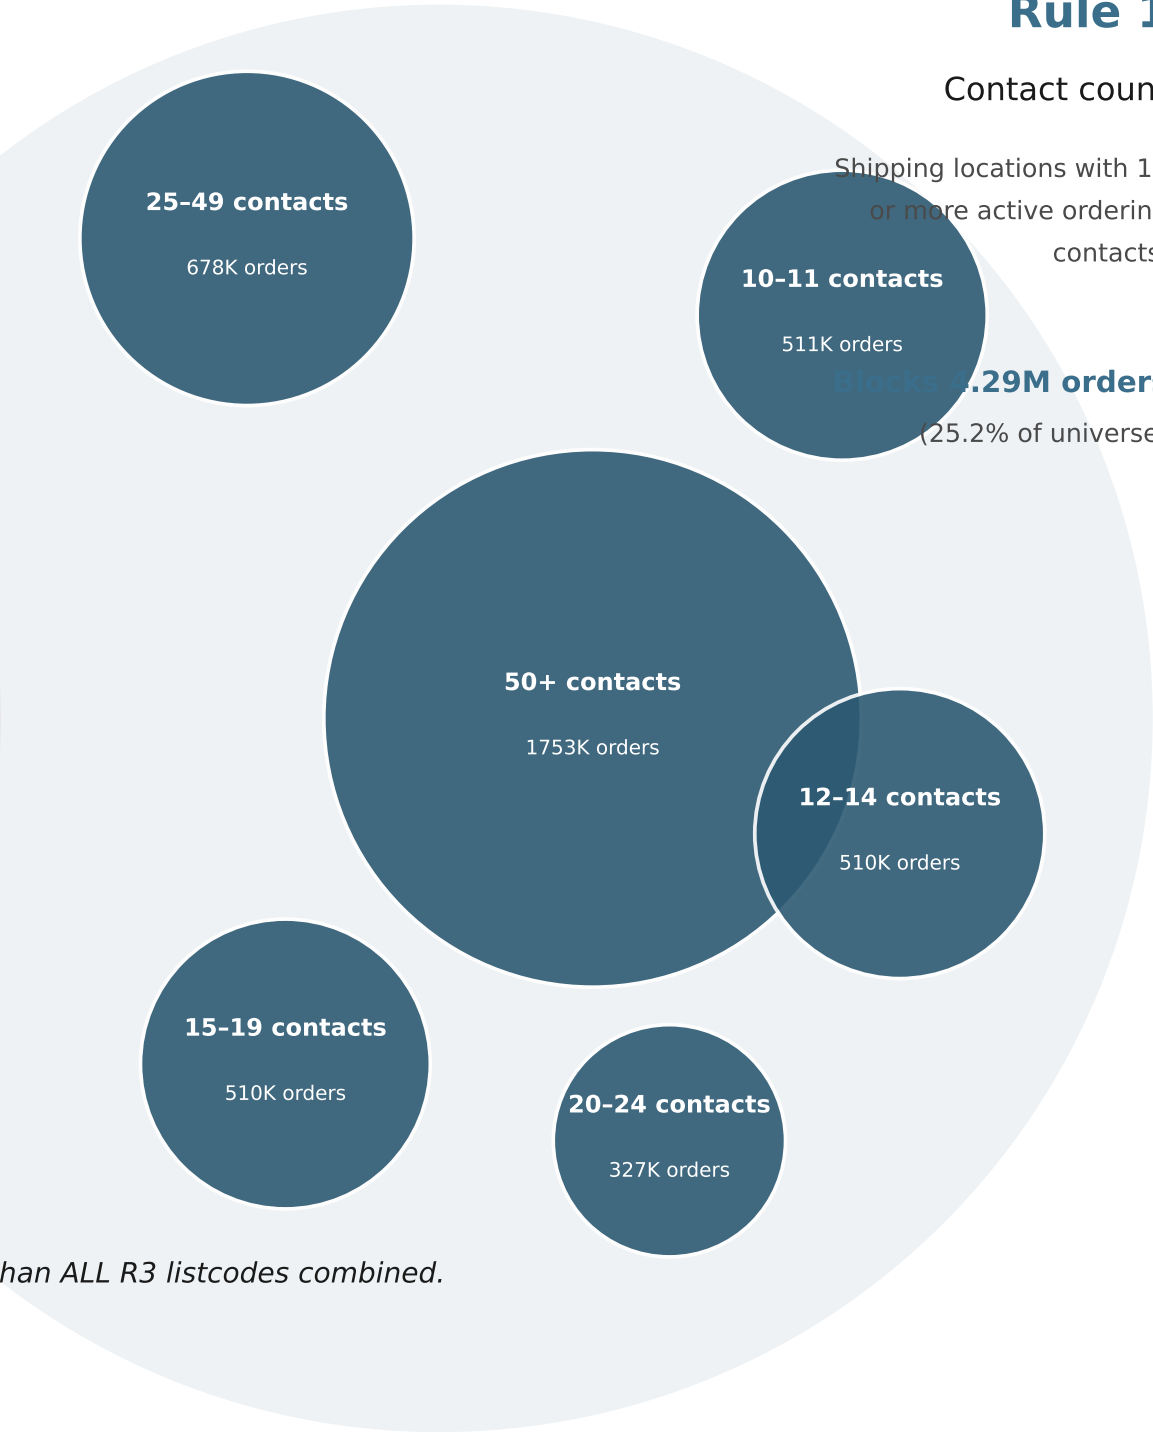

Rule 1

Contact count

Shipping locations with 10 or more active ordering contacts.

Blocks 4.29M orders

(25.2% of universe)

R1 n R3
1,446
CMFs fail both

(both a bad listcode
and 10+ contacts)

The single 50+ contacts band blocks more orders than ALL R3 listcodes combined.

Eligible pool

≈ 11.8M orders · 69% of universe

Bubble size ∝ orders blocked · Same scale across both rules
